

# New Zealand and Korea

New Zealand is very good country because New Zealand air is very clear than Korea because New Zealand has a lot of trees and grasses. In Korea the air is dirtier than New Zealand because Korea hasn't got a lot of trees and grasses.

There are lots of things that are different in New Zealand. 9 months ago I came to New Zealand and was surprised because New Zealand's airport was much smaller than Korea's airport.

New Zealand weather is good because New Zealand summer is warm and the winter is cool, but New Zealand weather is also changeable.

New Zealand has two main types of people; Maori and European. There are also many Pacific Islanders and Asians living in New Zealand.

New Zealand has many different birds such as the Kiwi, Tui, and Pukehoe. New Zealand hasn't any snakes, poisonous spiders or bears. Korean people even eat snakes because they are good for your health.

In Korea people eat some rice for almost every meal. New Zealand people like lollies and bread. Korea people like very hot food. In Korea we have lot of meals in restaurants but in New Zealand most people have there meals at home.

New Zealand is a good country. Almost all New Zealand people don't wear shoes. They walk around the playground in their bare feet. Almost all New Zealand people like rugby. The New Zealand rugby team is called the All Blacks. I heard from people, that the All Blacks are a very good rugby team.

In New Zealand there are three 'Kiwis': A person who comes from New Zealand is called a Kiwi, there is a bird called a kiwi and also a fruit called a kiwi (kiwifruit).
