

Dragons

Once there was an ancient castle nestled on the shore of a contagious lake there were soldiers guarding the castle from the most horrible dragon.

He has mean sharp teeth but he's a fire breathing dragon, no other dragon liked this one because he kills his friends. If you find him run because he's not nice as all so don't go near him.

Now these people are cool so they are Jack, Matt and Josh. my name you ask? it is Jay.

It is night, it was a windy night the dragon awakes the people are in danger the boys heard the people screaming so they ran out and helped them they helped kill the beast. but that's not all there's twenty hundred dragons" Matt said how are we going to kill twenty hundred dragons then the boys thought for an hour then Josh told them we should make an army of soldiers. so they did they made two hundred soldiers at night they went out to find the dragons it took all night to find one but he was sleeping! how depressing I went mad then he woke up we started fighting we were fighting for seven day then the other dragons heard the fighting so they started flying to help the dragons fight so they did "heaps of soldiers are dying" Josh told them.
